Fraction of extracted hypotheses eligible for both control contrasts
RAW157: CN/MCI/AD=100/41/16; ROI64_T1235: CN/MCI/AD=32/17/15; ROI64_T5: CN/MCI/AD=32/17/15
'n/a' = family not defined for that cohort/task (blocked or not applicable)
Macro 1: task-wide timing and fixation distribution
Macro 3: task saccade distribution
Macro 4: task scanpath organization
Macro 5: task/global pupil summaries
Macro 7: gaze–speech coordination across targets
Macro 8: context response and paired task contrasts
Micro 1: fixation burden and timing
Micro 6: speech production at the target
Micro 7: gaze–speech coordination
